

ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 68, 1989

ARONSON, J., E. GLASNER AND M. MISIUREWICZ Rigid sets in the plane	307
ARA, P. AND A. DEL RIO A question of Passman on the symmetric ring of quotients	348
BURGAIN, J. Homogeneous polynomials on the ball and polynomial bases	327
DOBOS, F. AND J. PEETRE Interpolation of compactness using Aronszajn-Gagliardo functors	220
ALLA, L. On a class of some special sets on the k -skeleton of a convex compact set	353
DEL RIO A. <i>See</i> P. Ara	
RIEDMAN, N. A. Mixing and sweeping out	365
URSTENBERG, H. AND Y. KATZNELSON Idempotents in compact semigroups and Ramsey theory	257
URUYA, K. Analyticity of nonlinear semigroups	89
EYER, W.-D. Algebraic function fields of one variable over finite fields are stable	102
ITIK, M. AND S. SHELAH Forcings with ideals and simple forcing notions	129
GLASNER, E. <i>See</i> J. Aaronson	
OWERS, W. T. Symmetric block bases in finite-dimensional normed spaces	193
ERNÁNDEZ, F. L. AND B. RODRIGUEZ-SALINAS On l^p -complemented copies in Orlicz spaces II	27
ANI, I. Counting finite index subgroups and the P. Hall enumeration principle	18
CH, T. AND S. SHELAH A note on canonical functions	376
DAH, H. AND S. SHELAH $MA(\sigma$ -centered): Cohen reals, strong measure zero sets and strongly meager sets	1

- KATZNELSON, Y. *See* H. Furstenberg
- LUNARDI, A. Differentiability with respect to (t, s) of the parabolic evolution operator
- MEESTER, R. W. J. AND T. NOWICKI Infinite clusters and critical values in two-dimensional circle percolation
- MISIUREWICZ, M. *See* J. Aaronson
- MONTGOMERY-SMITH, S. J. The Gaussian cotype of operators from $C(K)$
- MORANDI, P. J. AND A. R. WADSWORTH Baer orderings with non-invariant valuation ring
- NOWICKI, T. *See* R. W. J. Meester
- PANSU, P. AND R. J. ZIMMER Rigidity of locally homogeneous metrics of negative curvature on the leaves of a foliation
- PEETRE, J. *See* F. Cobos
- RODRIGUEZ-SALINAS, B. *See* F. L. Hernández
- SHELAH, S. More on monadic logic. Part D: A note on addition of theories
- SHELAH, S. *See* M. Gitik
- SHELAH, S. *See* T. Jech
- SHELAH, S. *See* H. Judah
- STEGALL, C. A proof of the theorem of Amir and Lindenstrauss
- STEIN, Y. The total reducibility order of a polynomial in two variables
- TALAGRAND, M. A conjecture on convolution operators, and a non-Dunford-Pettis operator on L^1
- WADSWORTH, A. R. *See* P. J. Morandi
- WOESS, W. Boundaries of random walks on graphs and groups with infinitely many ends
- ZIMMER, R. J. *See* P. Pansu
